PROFILE

My passion for digital solutions began as an E-Commerce Advisor with the Government of Canada, where I supported SMEs in e-commerce, digital marketing, and cybersecurity, while mentoring a team of 60 advisors to improve workflows. This sparked my interest in web development, leading me to earn a Software Engineering Diploma at BrainStation.

I've built user-centric applications using HTML, CSS, JavaScript, React, Node.js, and MySQL, with a focus on responsive design, APIs, and CMS platforms like WordPress. With a strong foundation in front-end and back-end development, I'm eager to create innovative solutions that solve real-world problems.

SKILLS

Front-End Development,
Back-End Development, Agile
Development, APIs, User
Authentication, CMS, Version
Control [HTML, CSS,
